# PRESSURE CONTAINERS

**Jerko**  
Sprühsysteme

# INEXPENSIVE AND SIMPLE

## This is what we offer

Mobile, compact and versatile.  
Manual spray system or compact solution for tests. The compact pressure containers with a usable volume of up to 18 litres are suited for all tasks.

Since handling is particularly easy, these containers are a popular starter solution.

With its well established components, the spray device is perfect for continuous use.

The pressure containers feature a circulation developed by Jerko so that they can be used for spraying lubricants and release agents containing solids.

All pressure containers can be equipped with a trolley so that they can be transported particularly easily.

# The advantages — an overview

- Compact, mobile and manoeuvrable
- Easy to operate
- Easy to clean
- Robust technology
- Suited for emulsions & suspensions
- Inexpensive
- 100 % stainless steel
- Designed and built according to Machinery Directive 2006/42/EC

## Technical data

Usable volume:	2–18 litres
Pressure:	6 bar
Features:	2 x pressure regulator
Connection:	½" compressed air quick couplings for spray gun

## Options

Circulation (e.g. lubricants containing graphite)  
Trolley  
Automatic dosing
