LUBRICANT PREPARATION SYSTEMS

Jerko
Sprühsysteme

**SAVE UP TO 80 % IN
LUBRICANT COSTS!**

This is what we offer

Jerko preparation systems are especially designed as per the requirements for forming lubricants.

Efficient cleaning of water-soluble lubricants. Dispersions and suspensions can also be prepared.

AND

You can reduce the disposal costs through cleaning process water.

Also under an economic aspect is the preparation system the perfect addition to our efficient spray systems.

With a Jerko preparation system you can save up to 80 % in lubricant and disposal costs. In many cases, the ROI is less than one year!

Score with new, innovative solutions at your next environmental audit!

From manual to fully automatic preparation systems — together we will develop the solution that fits you best.

The advantages — an overview

- **Modular concept**
- **ROI < 1 year**
- **Low-maintenance**
- **Ecological**
- **Economic**
- **Devices also available for rent**
- **Designed and built according to Machinery Directive 2006/42/EC**

Technical data

AB1

Throughput:	up to 60 l/min
Cleaning:	manual
Required space:	6 m ²
Lubricants:	water-soluble

AB2

Throughput:	60 l/min – 120 l/min
Cleaning:	semi-automatic
Required space:	12 m ²
Lubricants:	water-soluble/ suspensions/dispersions

AB3

Throughput:	up to 120 l/min
Cleaning:	fully automatic with dirt removal
Required space:	8 m ²
Lubricants:	water-soluble/ suspensions/dispersions
